

## **Commvault Backup Engineer**

**Xpanse Pty Ltd** is looking to expand its WA operation by securing the services of an experienced Commvault Backup Engineer to join our existing Data Protection Team.

- Exciting opportunity to work with a group of dedicated data management professionals within a diverse range of clients and technology.
- Western Australian Based & Owned.
- Permanent Full Time or contract-based options for the right candidate.

### **Company Background:**

Xpanse Pty Ltd is a specialised integrator of Data Management Solutions focusing on the supply & implementation of network storage solutions & complimentary technologies including storage/server/desktop virtualisation & WAN optimisation.

The suitable candidate will be working with a focused, successful team and will be empowered & have the opportunity to contribute to the growth of the company.

### **The main responsibilities for the successful candidate are as follows:**

- Work with a variety of clients to provide design, installation, support and management of enterprise backup products focusing on Commvault v11 Data Protection and Management software.
- Play a leading backup project delivery role in scoping, design and implementation of both small and larger data environments.
- Provide consultancy and best practice recommendations to customers on the integration and upgrade of their existing environments, utilising Commvault v11 Data Protection and Management software.
- Occasional travel outside of Perth for remote installations.

### **The ideal candidate will possess the following:**

- Work with a variety of clients to provide design, installation, support and management of enterprise backup products focusing on Commvault v11 Data Protection and Management software.
- Play a leading backup project delivery role in scoping, design and implementation of both small and larger data environments.
- Provide consultancy and best practice recommendations to customers on the integration and upgrade of their existing environments, utilising Commvault v11 Data Protection and Management software.
- Occasional travel outside of Perth for remote installations.

If you possess the qualities above and are looking to recognise your full potential in an organisation
