Windows / Storage Engineer

xpanse Pty Ltd is looking to expand its WA operation by securing the services of a full time Windows / Storage Engineer.

- Western Australian Based & Owned
- Vibrant Career Path "we invest in the development of all our staff"
- Opportunity to work with a diverse range of clients and technology

Company Background:

xpanse Pty Ltd is a specialised integrator of Data Management Solutions focusing on the supply & implementation of network storage solutions & complimentary technologies i.e. storage/server/desktop virtualisation & WAN optimisation

The suitable candidate will be working with a focused, successful team & will be empowered & have the opportunity to influence and contribute in the growth of the company.

The main responsibilities for the successful candidate are as follows:

- Take ownership of the delivery of Windows based NetApp SnapManager products
- Provide suitable support and implementation recommendations to customers on the integration of Windows platforms and NetApp storage
- Work closely with other xpanse Engineers on architecting solutions to meet customer requirements and exceed their expectations

The ideal candidate will possess the following:

- Minimum 5 years' experience in a System Engineer role
- Relevant industry certifications including MCTIP
- Strong working knowledge of Active Directory, CIFS & TCP/IP
- Familiarity with enterprise storage appliances including NetApp FAS
- A real drive to provide outstanding customer service and work with some very exciting technology
- Exposure to enterprise backup products would be looked upon favourably

If you possess the qualities above and are looking to recognise your full potential in an organisation that's built to help you achieve, please submit your resume with an expression of interest to recruitment@xpanse.com.au today.
